

Securely enabling your business

OUR SERVICES

Flexible tech for your business

Cybit is the one-stop-shop for digital transformation offering flexible tech that scales in line with your business growth. We partner with your business to design, deliver and manage intelligent IT services, cloud migration, data and analytics and cyber security solutions.

Discover our multi-service offering:
Cyber Security | Data & Analytics |
Managed IT Services | Cloud Solutions
Everyday IT Support | Managed
Infrastructure

Our experienced security professionals operate as an extension of your team, providing the knowledge and technical expertise to manage the cyber threats facing your business.

We partner with a network of industry leading security vendors, which means you get the best solution suited to your business, not ours.

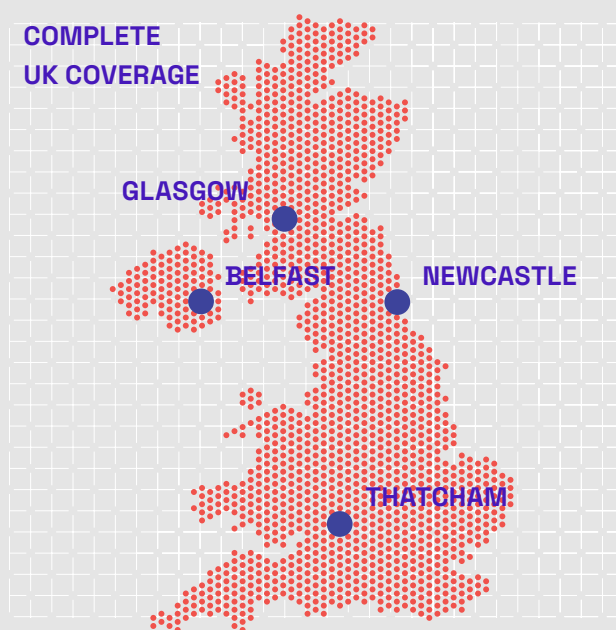

Cybit's combination of world class cutting-edge technology and industry experience, means our technical team design and deliver services and solutions that add real value to our customers, ranging from single devices to complex enterprise-grade security architecture.

Cybit.com

Time to bring in the experts!

Cybit has been demystifying technical complexities for over 30 years with flexible products and services that scale.

And, at the same time delivering expertise in designing, implementing and supporting technical security solutions to meet our customers needs.

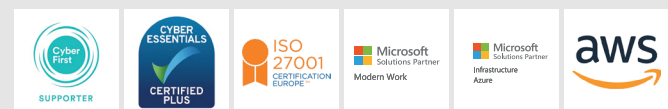

It's this end-to-end technical solution, from how you manage, store, secure and analyse both business and data, that powers our customers' growth ambitions and takes each customer on their individual journey to digital transformation.

With Cybit you'll get a national team of proven experts across the UK, who deliver customised technical support and cyber security with insight, clarity and customer commitment. This level of expertise and experience means we can deliver a diverse skill set under one roof, that's unmatched in the industry.

We are **ISO 27001**, **IASME Audited** and **Cyber Essentials +** certified and all staff are subject to UK Government security vetting.

Information. Then technology

At Cybit, we believe any investment you make in our solutions and support should help your business thrive. Which is why our expert consultants will work closely with you and your team to gather all the information they need to gain a complete understanding of your business objectives and plans for the future.

Once they have the full picture, they will design and recommend a solution or service that will let your business achieve its immediate goals quickly while also ensuring that there is enough flexibility built into the solution so it can scale with your business as it grows.

Plus, they'll do it in plain English, with no fuss, no hard sell and definitely no tedious tech talk

OUR FLEXIBLE FRAMEWORK

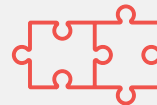

ANALYSE

We take time to discover and understand your business so we can deliver the right solutions shaped around your needs.

DESIGN

Creating and designing new systems free of vulnerabilities and attack through measures such as continued testing and authentication safeguards

INTEGRATE

Our experts can design, supply, and integrate security solutions into your technical and business environments

MANAGE

Our flexible, scalable managed services ensure that your systems are always protected and optimised.

SECURE

Our cyber security services pragmatic risk-based approach will ensure that appropriate and effective levels of security are in place to meet the demands of your business, your customers, and your industry.

The best solutions and services for your business, not ours!

As a certified and trusted technical partner, we know that one size does not fit all. That's why Cybit offers the highest range of market-leading end to end security services and solutions for mid-market to enterprise customers.

We specialise in security integration within highly complex IT/OT estates such as Central Government, Criminal Justice, Utilities, Health, Financial Services, Private & 3rd Sector

DATA & ANALYTICS

Let us help you get up and running with your business intelligence so you can take full advantage of your invaluable business data.

We offer a **Free Data & Analytics Health Check** delivered by one of our Technical consultants which will unravel your data complexity and provide a recommendation output document around your business challenges.

MANAGED IT SERVICES

While the demands placed upon your IT team continually grow in size and complexity, we understand that your budget doesn't.

Our **FlexCare packages** are tailored to your needs and provide cost-effective, easy access to a team of local experts in our Network Operations Centre (NOC) who are there to support your organisation and IT needs.

- ⊕ IT User Support
- ⊕ Managed Microsoft 365
- ⊕ Managed Infrastructure
- ⊕ Managed Network Services

CLOUD SERVICES

With over a decade of cloud migration and management experience with both **AWS** and **Microsoft Azure** recognising us as a certified leading support and consulting partner we can help you with cloud migration or to optimise your existing cloud solution to deliver incredible results.

Our Cloud Billing and Optimisation services can help bring costs down and make your cloud expenses easier to manage. We can help change how you are billed, remove unused or change under-utilised reserved instances, and more.

Let Cybit unravel your legacy IT and cloud migration complexity with our **Free Cloud Readiness Assessment**.

Delivered by one of our Cloud Architects we review your current and future infrastructure needs and provide recommendations for your IT Team or Cybit to assist with implementation.

Don't take our word for it.

Cybit has spent over 30 years working with some of the biggest businesses in the UK and across the globe to deliver intelligent and transformative IT and cyber security solutions.
